

Cultivate innovative solutions as a Java Full Stack Developer, emphasizing the design and implementation of efficient microservices and user-friendly web applications tailored for diverse industry needs.

PROFILE SUMMARY

- Experienced Java Full Stack Developer with over 2 years of full-time (2 years of freelance experience) experience in designing and delivering scalable full-stack and microservices-based applications across healthcare and enterprise domains.
- Skilled Software Engineer at Cognizant, contributed to the development of high-performance healthcare applications using Java 17, Spring Boot, and Angular within distributed enterprise environments.
- Proficient Full Stack Technologist with strong expertise in backend development, RESTful APIs, database management, API integration, and cloud deployment using Azure and Docker.
- Result-oriented Developer, worked on building microservices architectures and improving application performance through structured coding practices, Agile methodologies, and cross-functional collaboration.
- Security-focused Cloud Practitioner experienced in implementing secure application design, API security standards, and containerized deployments while ensuring scalable and maintainable solutions.

CORE COMPETENCIES

- Full Stack Application Development

Microservices Architecture Development

RESTful & SOAP API Development
- Spring Boot Backend Engineering

Frontend Development

Database Design & Management
- Cloud Deployment & DevOps

Unit Testing & Test Automation

Agile Software Development Lifecycle

SOFT SKILLS

EDUCATION & CERTIFICATION

CAREER TAKEAWAYS

- Security & Quality Focus:** Embedded security and code quality using OWASP, SonarQube, and high unit test coverage for reliable enterprise delivery.
- End-to-End Ownership:** Delivered complete full stack solutions independently across frontend, backend, integration, and deployment stages.
- Scalable System Design:** Built scalable microservices-based applications supporting high-volume enterprise workloads and cloud deployments.

FREELANCE EXPERIENCE

- Nov 2024 – Present | Freelance Java Full Stack Developer
- Full Stack Solution Development:** Designed and delivered end-to-end full stack solutions — Spring Boot REST APIs on the backend and Angular / React.js UI components on the frontend — across multiple client projects.
 - Application Development & Implementation:** Built an Inventory Management System with Spring Boot, JSP/Thymeleaf, Spring Security JWT, RBAC, and MySQL; achieved 85% test coverage using JUnit 5 and Mockito.
 - API Integration & Web Services Development:** Implemented SOAP Web Services alongside REST APIs, producing WSDL contracts and consuming external SOAP endpoints in Java.
 - Code Quality & Architecture Design:** Applied SOLID principles and layered architecture (Controller-Service-Repository); enforced code quality with SonarQube, achieving zero unresolved critical issues.
 - Cloud Deployment & DevOps Practices:** Containerised applications with Docker and deployed to Azure; established CI pipelines for automated build and test stages.

WORK EXPERIENCE

- Aug 2022 – Oct 2024 | Software Engineer — Cognizant
- Microservices Development:** Developed scalable RESTful microservices and web modules using Java 17, Spring Boot 3.x, Spring MVC, JSP/Servlets, and Hibernate for a Fortune 500 healthcare platform handling millions of daily transactions.
 - API Design & Integration:** Designed and implemented SOAP & REST Web Services for third-party integrations and cross-system data exchange; documented APIs using Postman collections.

- **Frontend Development:** Built dynamic front-end components using JavaScript, HTML5, and CSS3, enabling responsive desktop and web application interfaces.
- **Security Implementation & Compliance:** Implemented Spring Security + JWT authentication and role-based authorization; applied OWASP guidelines to secure API endpoints.
- **Code Quality & Testing:** Achieved 80%+ code coverage using JUnit 5 and Mockito; resolved 95%+ of critical vulnerabilities through SonarQube SAST/SCA scans ensuring enterprise compliance.
- **Issue Resolution & Collaboration:** Reduced JIRA issue resolution time by 30% through root-cause analysis and effective collaboration with QA teams.
- **Environment Configuration & Deployment Support:** Configured and maintained Apache web server settings for test and staging environments hosted on Azure infrastructure.

TECHNICAL SKILLS

- **Languages:** Java 17, JavaScript, SQL, HTML5, CSS3, XML
- **Backend:** Spring Boot 3.x, Spring MVC, Spring Security, JSP, Servlets, Hibernate, JPA, REST API, SOAP / Web Services
- **Frontend:** Angular, React.js
- **Auth & Security:** JWT, Spring Security, OWASP, SAST, SCA, SonarQube
- **Databases:** MySQL, Oracle
- **Testing:** JUnit 5, Mockito, Integration Testing, TDD
- **Tools:** Azure, Docker, Jenkins, Apache, Maven, Git, Postman, JIRA
- **Practices:** Microservices, Full Stack Development, API Integration, High Availability, SOLID Principles, Agile/Scrum
- **Generative AI:** Prompt Engineering, LLM API Integration (Groq), Agentic AI, Multi-Agent Systems
